

PRODUCTIVE WORLD PRODUCTIVE CENTURY SMALL SCALE PARTNERSHIP VOCATIONAL TRAINING

PROJECT NUMBER: 2021-1-ES01-KA210-VET000034517

Our project is about establishing a professional strategic partnership to increase energy efficiency and green awareness.

The realization of the industrial revolution in EU countries and in our country depends on the availability of trained manpower and the efficient use of energy.

It is known that with industrial revolutions, the need for highly qualified manpower will increase and new professions will emerge. It is among our priorities to identify people's educational habits, practices and usage habits related to electrical and electronic devices, who use vocational education tools and integrate energy efficiency issues into vocational education.

KANUNİ SULTAN SÜLEYMAN VOCATIONAL AND TECHNICAL ANATOLIAN HIGH SCHOOL

VISITING GAZİANTEP CHAMBER OF COMMERCE

Adopting the vision of leading Gaziantep to be one of the top four provinces in the country's economy, the institution aims to provide its stakeholders with sustainable competitiveness to Gaziantep and the region.

Our school started education in 2009. Education and training are carried out in 5 areas, namely Biomedical Device Technologies, Food Technologies, Electric - Electronic Technologies, Information Technologies and Renewable Energy Resources Technologies.

As of the 2020-2021 academic year, education continues with around 1152 students and 90 personnel. Our school is the locomotive of our province in vocational education.

Please follow us on social media and website to benefit from the outputs of our project and contribute by expressing your opinion. <http://pwpc-erasmus.com/>
